LIVE THE ADVENTURE WITH SPOT LIVE MAPS

Let your followers take it to the next level and follow your progress Live via SPOT Live Maps. Find out how to stream your SPOT waypoints live through the SPOT Adventures Live Map and drop the map widget into your web page. Have a personal blog or other site and want to stream your live waypoints? Just set up your SPOT Adventures Profile and stream one of your Shared Pages as a Live Map. This is a great tool for people away from home for long periods of time. They can just stream tracking data for those they give access to see they are out there doing just fine. Have a big adventure race or maybe you're an outfitter showing where you're off to? The Live widget is perfect for you. Click [READ MORE](#) below to learn how to get it.

- First, set up your SPOT Adventures Profile. To see how to set up your SPOT Adventures Profile and see how Live Maps work, click [here](#).
- To embed the Live Map widget in your site, just click on "Share this" on your Live Map. Directions and a code will pop up that your web editor can use to insert in your own site.
